

Global First - Center for Combating Pandemics

Tel Aviv University recently launched the Center for Combating Pandemics, the first of its kind in Israel and possibly the world. Building on TAU's innovation record, interdisciplinary culture, and strong links with hospitals, industry and government, the Center has three main focusses. It will strive to improve frontline containment of infection, bolster biomedical knowledge for developing vaccines and treatments, and strengthen nations' capacity to ensure social and economic resilience. Please watch this video or click on the link below for more information. To learn more about the center click [here](#).

**The Venture Brief with
Nimrod
Cohen**

**Managing Partner at
TAU Ventures**

"We don't want to create just another VC. The main thing we are doing here is creating an entire ecosystem around us. We take advantage of the fact that Tel Aviv University is a great brand and resource. We bring industry and corporates as close as we can, to collaborate with potential customers of our startups and engage the university in any way we can. This is what creates value." Nimrod Cohen

●●● BREAKING NEWS

TEL AVIV UNIVERSITY TEAM RECEIVES PRIZE FOR SIGNIFICANT TECHNOLOGICAL IMPACT TO FILM INDUSTRY

Every year, in addition to the winners of the traditional Oscars, the American Academy of Motion Picture Arts and Sciences announces winners of a significant scientific and engineering contribution to the film industry: TAU faculty and TAU Alumni winners were announced last week as part of the start-up Amimon, wireless video technology. Congratulations!

(Left to right): Guy Dorman, Dr Zvi Reznic, Prof. Meir Feder and Ron Yogev.

TEL AVIV'S ECOLOGICAL OASIS: THE YEHUDA NAFTALI BOTANIC GARDEN AT TAU

A donor-supported renovation focuses on research, facilities and visitor access. TAU's Yehuda Naftali Botanic Garden is a Tel Aviv oasis for all, a collaborative research hub for plant scientists, engineers and neuroscientists, as well as a beautiful urban nature site that welcomes schoolchildren, soldiers and the general public and numbers among the city's top tourist attractions.

National Cancer Prevention Month

TAU research proves connection for first time, can be base for cancer drugs

What makes cancer cells different from ordinary cells in our bodies? Can these differences be used to strike at them and paralyze their activity? The search for unique characteristics of cancer cells is a building block of modern cancer research. Read more about a new study at Tel Aviv University.
