

## We Are Part of the Problem And the Solution

David Burns and Austin Young (Fallen Fruit), *Detail of Promised Land*, 2020.

In recent years, the climate crisis has evolved from a scientific term to a reality we can feel, while the irreversible loss of species and ecosystems has become one of humanity's greatest challenges today. Just recently, Tel Aviv University launched the multidisciplinary [Center for Climate Change Action](#), and now two exhibitions on campus tackle these exact issues.

The Plan(e)t exhibition at TAU's [Genia Schreiber University Art Gallery](#) places plants at its heart, portraying their valuable contribution to our survival on Earth through a series of projects which integrate scientific research with artistic endeavour. This thought-provoking exhibition recently became the first university gallery in Israel ever to have been shortlisted by the International Council of Museums for the UMAC Award for Best Exhibition. We invite you to take a virtual tour through the exhibit with the Gallery's curators, in the 'Research of the Week' section of this email.

But that's not the only environmental exhibition on campus right now. The [Steinhardt Museum of Natural History's](#) new temporary exhibit, "It's Warming Up: The Climate, the Crisis and Us", shows the latest scientific findings on the environment crisis, in Israel and around the world, displayed using interactive exhibits. You can read more about it in our 'News and Updates' section.

Last but not least, in our 'Webinar Library', you'll find a special webinar, organized by TAU's Boris Mints Institute and featuring Israeli President Hon. Isaac Herzog, where top experts from Israel and Europe help separate legitimate critique from anti-Semitism and explain what we can do to mediate Israel to European countries.

Stay safe and Shabbat Shalom,

Cara G. Case

Chief Executive

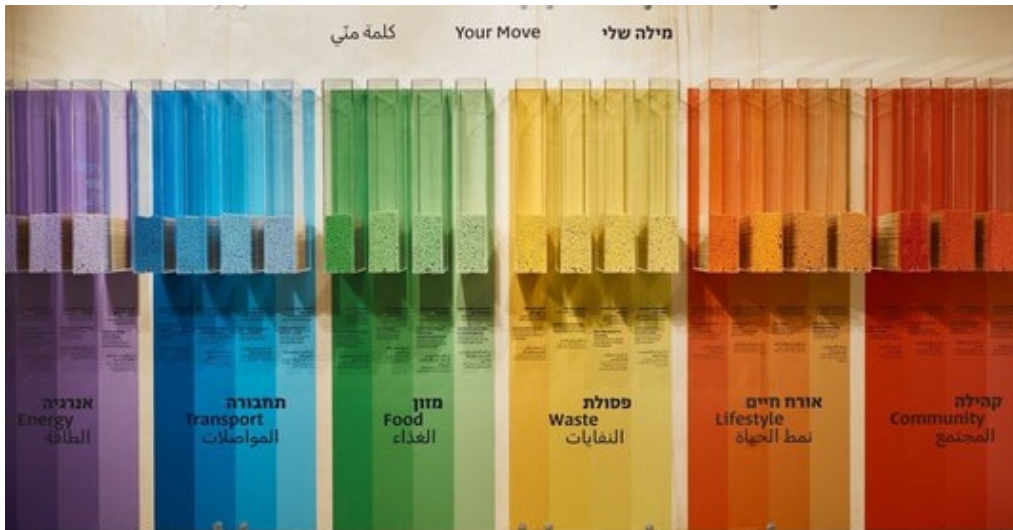

## News and Updates

### TAU Gallery 'Plan(e)t' Nominated for UMAC Award for Best Exhibition

"This announcement is a recognition of the collaborative and groundbreaking work that is being done in our Gallery between artists – both Israeli and international – and between scientists", The Jpost reports.
